DIK EAST COAST

Bisphenol-A type liquid epoxy resin E-51 is an unmodified liquid epoxy resin with medium viscosity produced from bisphenol-A and epichlorohydrin. This is a standard liquid epoxy resin and a wide variety of curing agents are available to cure this liquid epoxy resin at ambient conditions and also at elevated temperature. When cured with appropriate hardener, E-51 gives excellent mechanical, chemical, electrical and adhesion properties. Because of these properties it finds use in various applications.

- Solvent based, high solid content and solvent-free coatings
- Adhesives

This product is packed and transported in 220kg sealed iron drum.

Other packaging can be provided on request.

- 1). Epoxy resin should be stored in a cool and dry place, avoid rain and sun exposure.
- 2). When deploying epoxy resin, it is necessary to use it now and mix the curing agent in proper proportion to avoid waste.
- 3). Epoxy resin storage life is generally 1 year, beyond the time limit should be tested, meet the index can still be used. EAST COAST
